Docket

No.

Term	Definition
1. Accounting	Accounting is the process of recording, summarizing, and reporting the financial transactions and events of an organization in a systematic and concise manner.
2. Accounting cycle	An accounting cycle is a series of eight steps that are used to record and summarize the financial transactions of an organization.
3. Accounting equation	The accounting equation is a fundamental principle of accounting that states that the total assets of an organization are equal to the total liabilities and equity.
4. Accounting period	An accounting period is a specific time interval over which financial transactions are recorded and summarized.
5. Accounting system	An accounting system is a set of procedures and controls that are used to record and summarize the financial transactions of an organization.
6. Accounting software	Accounting software is a computer program that is used to automate the accounting process and generate financial statements.
7. Accounting journal	An accounting journal is a record of all the financial transactions of an organization, organized in chronological order.
8. Accounting ledger	An accounting ledger is a record of all the financial transactions of an organization, organized by account.
9. Accounting trial balance	An accounting trial balance is a statement that shows the total debits and credits for each account, used to verify the accuracy of the accounting records.
10. Accounting income statement	An accounting income statement is a financial statement that shows the revenues, expenses, and net income of an organization.
11. Accounting balance sheet	An accounting balance sheet is a financial statement that shows the assets, liabilities, and equity of an organization at a specific point in time.
12. Accounting cash flow statement	An accounting cash flow statement is a financial statement that shows the cash inflows and outflows of an organization over a period of time.

Term	Definition
1. Accounting	Accounting is the process of recording, summarizing, and reporting the financial transactions and events of an organization in a systematic and concise manner.
2. Accounting cycle	An accounting cycle is a series of eight steps that are used to record and summarize the financial transactions of an organization.
3. Accounting equation	The accounting equation is a fundamental principle of accounting that states that the total assets of an organization are equal to the total liabilities and equity.
4. Accounting period	An accounting period is a specific time interval over which financial transactions are recorded and summarized.
5. Accounting system	An accounting system is a set of procedures and controls that are used to record and summarize the financial transactions of an organization.
6. Accounting software	Accounting software is a computer program that is used to automate the accounting process and generate financial reports.
7. Accounting journal	An accounting journal is a record of all the financial transactions of an organization, organized chronologically.
8. Accounting ledger	An accounting ledger is a record of all the financial transactions of an organization, organized by account.
9. Accounting trial balance	An accounting trial balance is a statement that shows the total debits and credits for each account, used to verify the accuracy of the accounting records.
10. Accounting income statement	An accounting income statement is a financial statement that shows the revenues, expenses, and net income of an organization over a specific period.
11. Accounting balance sheet	An accounting balance sheet is a financial statement that shows the assets, liabilities, and equity of an organization at a specific point in time.
12. Accounting cash flow statement	An accounting cash flow statement is a financial statement that shows the cash inflows and outflows of an organization over a specific period.
13. Accounting budget	An accounting budget is a financial plan that outlines the expected revenues and expenses of an organization for a specific period.
14. Accounting variance	An accounting variance is the difference between the actual results and the budgeted results of an organization.
15. Accounting control system	An accounting control system is a set of procedures and controls that are used to ensure the accuracy and reliability of the accounting records.

Docket

No.

Term	Definition
1. Stress	Stress is a response to a stimulus or stressor. It is a state of mental or emotional strain or tension resulting from adverse or demanding circumstances.
2. Stressor	A stressor is any event or situation that causes stress. It can be physical, emotional, or psychological.
3. Acute Stress	Acute stress is a short-term response to a stressor. It is characterized by a rapid onset and a quick resolution once the stressor is removed.
4. Chronic Stress	Chronic stress is a long-term response to a stressor. It is characterized by a prolonged duration and can lead to serious health problems if not managed.
5. Stress Response	The stress response is the body's reaction to a stressor. It involves the activation of the sympathetic nervous system and the release of stress hormones like cortisol.
6. Stress Management	Stress management refers to the techniques and strategies used to control or reduce the impact of stress on one's life.
7. Stressors	Stressors are the external factors that trigger the stress response. They can be categorized into physical, emotional, and psychological stressors.
8. Stressors	Stressors are the external factors that trigger the stress response. They can be categorized into physical, emotional, and psychological stressors.
9. Stressors	Stressors are the external factors that trigger the stress response. They can be categorized into physical, emotional, and psychological stressors.
10. Stressors	Stressors are the external factors that trigger the stress response. They can be categorized into physical, emotional, and psychological stressors.
